

PERCOLATE LMS™ RANKED #28 ACCORDING TO THE 2014 STATE OF THE LMS INDUSTRY REPORT

Scottsdale, AZ – January 23rd, 2014: Michaels & Associates received high honors this week for their Percolate LMS—now globally recognized as one of the top learning management systems (LMSs) according to the 2014 State of the LMS Industry Report authored by Craig Weiss of E-Learning 24/7.

The Percolate LMS, a strong newcomer to the industry, is ranked #28 in the report's Top 50 LMSs of 2013-2014.

Craig Weiss, an expert in LMS research and thought leader in the e-learning industry, based LMS rankings on various criteria including product features, ease of use, implementation process, support and pricing. He performed his research on over 500 LMSs before narrowing his selection to the top 50.

"Your system (Percolate LMS) is ideal for folks who are looking for a lower cost alternative that still can provide them with a solid set of features and offers a very modern and crisp user interface that is easy to use," Craig Weiss said when contacting Michaels & Associates about Percolate's ranking in the report.

Subscription-based and cloud-resident, Percolate is ideally suited for small and medium-sized companies; however, larger organizations needing a reliable test sandbox can use Percolate prior to loading training content into their more complex and complicated systems. Percolate's 90 second demo featured in the report can be viewed here: <http://www.lmsdemos.com/video/78579408>.

"We are so excited to be included in the Top 50 LMSs, and ranking at #28 was the icing on the cake. Michaels & Associates offers custom training development services for L&D. We're not a software company, specifically, and our Percolate LMS, which debuted less than two years ago, competes in a very tough field. We could not be happier to place so high 'right out of the gate' so to speak." said Sherry Michaels, President of Michaels & Associates.

Ranking #28 of the Top 50 LMSs in a remarkably short time span, Percolate is already positioning itself as *the* customer centric and user friendly LMS—and one to keep a close eye on in future.

“Our developers work daily to improve Percolate, and we’re ever-diligent in reaching out to our subscription and trial members for feedback. We’ll provide administrators and learners even more of the things they like, with none of the feature bloat or clumsy navigation typically found in an LMS,” Sherry said. “Ranking this high this early sends a clear signal that we’re succeeding. And we’re not done! We will continue to focus on what we do best and work on our goals of ease of use and an enhanced feature set.”

About Percolate LMS™ –It’s Just that Simple

Based on a software-as-a-service (SaaS) model, the Percolate LMS leverages the web and eliminates the need to install software on a company network. Accounts begin with a 30-day trial at no charge. Percolate offers flexibility with four monthly subscription plans. Plans start at \$99/month for 25 active users and increase to \$1099/month for 1000 active users, with custom plans for companies with more than 1000 active users. When signing up for a monthly subscription, account holders will continue using Percolate as they have from the first day. There is no need to start over.
